

EP Pathways

English for Academic Purposes + IELTS 6.0

EAP+IELTS 6.0

Introduction

The EAP + IELTS 6.0 programme prepares you to perform a wide range of general and academic tasks at an English level equivalent to IELTS 5.0–6.0. While the primary aim of the course is to strengthen your English for Academic Purposes and equip you with the skills needed for success in Higher Education, it also builds your confidence and provides effective strategies for the IELTS test.

The programme includes EAP-specific assessments and tasks aligned with IELTS-style criteria, helping you understand expectations while developing overall language proficiency. Throughout the course, you will improve your academic speaking, listening, reading and writing skills, gaining the language competence needed for further academic study.

Entry to the programme requires IELTS 5.0 or equivalent, and successful participants are able to progress to their chosen academic pathways. Daily lessons combine targeted language development with essential academic training delivered by experienced tutors. You will develop key academic skills such as note-taking, referencing, critical reading and presenting, while independent study enables you to apply what you learn in class.

EP Pathways

Course content

As an English for Academic Purposes programme, the course's main focus is on developing the academic English, study skills, and communication strategies you need for successful progression into Higher Education. This structured programme develops academic skills and English through regular assessment, one-on-one tutor feedback, and integrated IELTS-style tasks to prepare you for the exam required for university entry.

Preparation for the IELTS test will include you reviewing essential academic vocabulary and expressions, practising effective strategies for each IELTS test section, and completing focused tasks in reading, listening, writing, and speaking. You will refine your writing accuracy and organisation, develop clearer ideas, strengthen listening and reading speed and comprehension, and improve grammar through targeted practice.

The course also includes practice with real IELTS test papers, a full timed mock test, and personalised feedback to address remaining weaknesses, helping you build the competence and confidence needed for success in both academic study and the IELTS test.

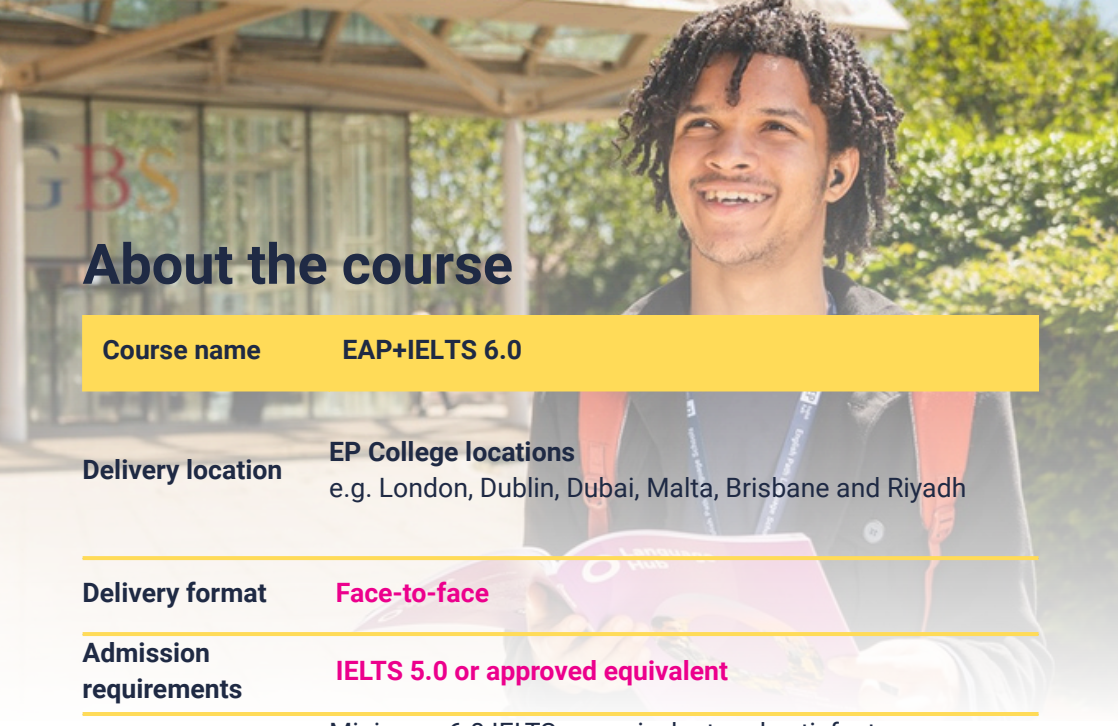

Progression

Upon successfully completing the course, you will receive:

- An official IELTS test result, which is recognised globally for university admission*
- An EP certificate confirming the academic English level you reached and assessment record detailing final grades.

**when you receive your result will depend on when the test is booked.*

EP Pathways

About the course

Course name	**EAP+IELTS 6.0**
Delivery location	**EP College locations** e.g. London, Dublin, Dubai, Malta, Brisbane and Riyadh
Delivery format	**Face-to-face**
Admission requirements	**IELTS 5.0 or approved equivalent**

EP Pathways

Course learning outcomes

Upon successful completion of this course, students will be able to:

Knowledge and understanding

- Engage with academic texts using effective reading strategies such as skimming and scanning, predicting, summarising and paraphrasing and critical reading.
- Apply active listening strategies such as taking purposeful notes, to effectively follow academic lectures, discussions, and presentations.
- Demonstrate understanding through structured and coherent written responses, summarising key points and arguments from spoken input.

Academic skills

- Produce well-structured and well-supported academic essays and presentations.
- Take clear and purposeful notes from lectures and readings to summarise, analyse, and apply key information effectively.

Critical thinking and research

- Differentiate between fact, opinion, and bias, and evaluate the credibility of academic sources. Use accurate referencing and citation conventions in accordance with academic standards.
- Understand basic research methodologies, analyse research data, and present reasoned conclusions.

Communication and collaboration

- Engage confidently and appropriately on seminars, discussions, and collaborative academic activities. Contribute constructively to group tasks, showing awareness of intercultural and academic communication norms.
- Adapt communication style to suit academic and collaborative contexts, including written and spoken interactions.

Independent learning and reflection

- Apply effective self-reflection techniques and independent learning strategies to enhance academic performance.
- Set academic goals, monitor progress, and adjust strategies to meet learning outcomes.
- Evaluate academic performance and identify areas for skill development.
- Reflect critically on feedback and use it to improve academic achievement.

Learning outcomes for IELTS

- Receive personalised feedback to quickly improve your language skills and overcome your final challenges.
- Master proven exam strategies to boost your score and perform at your best on test day.
- Be fully prepared and confident for the IELTS Academic test with a clear understanding of the format, tasks and expectations.
