

# Pre-Masters in Management Studies

EPFS PMP - 32 Weeks

## Introduction

This Pre-Master's programme in Management is designed to prepare students for a master's degree in business management. The programme is designed to bridge the gaps in academic preparation, improve English language skills, and deepen understanding of core business concepts.

The programme includes modules to enhance English language proficiency, particularly for international students, and provide guidance for gaining skills in using English for academic purposes. The programme also incorporates modules focused on research methods, critical thinking, and analytical skills.

A typical day for students will include three hours of classroom instruction which includes foundational training in business studies and language skills guided by expert teachers and one hour of academic skills training, where they learn and implement learned skills. Students will be assigned a research project designed to develop advanced analytical and critical thinking skills. For their final assessment, they will submit a comprehensive report detailing their research and conclusions, accompanied by either a presentation or an oral discussion with the examiners.

<b>Course name</b>	EPFS PMP - 32 Weeks
<b>Delivery location</b>	<b>EP College Locations</b> (E.G. UK, Dubai, Toronto, Ireland and Berlin), university partner premises

# Course learning outcomes

**Upon successful completion of this course, students will be able to:**

## Knowledge and understanding

- Engage with academic texts using effective reading strategies.
- Produce clear, coherent academic writing using appropriate styles, structures, and conventions (e.g. hedging, referencing, signposting).
- Communicate ideas effectively and participate confidently in academic discussions, seminars, and presentations, demonstrating clarity, fluency, and audience awareness.

## Academic skills

- Produce well-structured, evidence-based academic research reports that follow appropriate academic conventions.
- Respond constructively to feedback, identifying areas for improvement and integrating changes into future work.
- Plan and deliver structured academic presentations with clarity, logical flow, and effective use of visual aids.

## Critical thinking and research

- Distinguish between fact, opinion, and bias, and critically assess the credibility and relevance of sources.
- Apply accurate referencing and citation techniques consistently across a range of academic formats.
- Demonstrate understanding of research methodology and apply critical and analytical thinking to interpret data and present well-reasoned conclusions.

## Communication and collaboration

- Engage proactively in academic discussions, group tasks, and collaborative activities, demonstrating respect for diverse perspectives and effective interpersonal skills.
- Adapt language and register appropriately for a range of academic communication contexts, including group discussions, email correspondence, and peer feedback.
- Demonstrate leadership, initiative, and accountability when contributing to collaborative academic projects and problem-solving tasks.

## Independent learning and reflection

- Apply effective self-reflection and independent learning strategies to monitor progress, set goals, and take responsibility for academic development.
- Critically evaluate personal learning strategies and make informed adjustments to improve academic performance and autonomy.
- Seek out and utilise appropriate academic resources (e.g. journals, databases, support services) to enhance subject knowledge and skill development.
